PROFESSIONAL SUMMARY

Results-driven **iOS & Flutter Application Developer** with **8+ years** of experience in designing, developing, and deploying high-quality native and cross-platform mobile applications. Skilled in **Swift, SwiftUI, Flutter**, and Firebase, with strong UI/UX understanding and hands-on experience integrating payment gateways, version control. Passionate about clean architecture, performance optimization, and delivering user-centric mobile experiences. Published **6+ Apps on the App Store** across high-impact domains such as **E-commerce, Real-estate, Sports, Utilities** and **Health & Fitness**.

WORK EXPERIENCE

ZAP Power FZCO

iOS & Flutter Application Developer

Jul 2023

Dubai, UAE

- Research on battery features and working on developing a driver and customer mobile application in Swift & Flutter from scratch.
- We are fetching live battery data from firebase and showing it on the customer app. Also fetching real time truck battery data and driver location.
- Used google map to show assigned live driver location on customer app.

Tecocraft Infusion PVT LTD

Sr. iOS Application Developer

Aug 2020 – May 2023

Surat, India

- Designed and developed multiple applications using Swift & SwiftUI.
- Worked on product base & client base project in an iOS platform. And creating applications based on customer demands, trends and market gaps.
- Implemented hardware sensor activation with Libre2 Sensor.
- Used MVC, MVVM design pattern, Realm database, Firebase for chatting, push notifications and storing auth credentials, Payment gateways (Apple pay, Stripe).
- Optimization and migration of Core Data.

Varshaa WebLabs

iOS Application Developer

Mar 2018 – Aug 2020

Surat, India

- Designed and developed multiple applications using Swift & Flutter.
- Planned, researched and developed program logic and code tests.
- Collaborated with design teams to effectively meet development requirements and enhance user experiences.
- Maintaining, optimizing, troubleshooting, improving and implementing new features in the app.
- Used MVC design pattern, Realm database, Firebase for chatting and push notifications, Payment gateways (Payumoney, Stripe, Paypal).
- Learned how to upload applications on the app store.

BrainWaves

Jr. iOS Application Developer

Nov 2017 – Feb 2018

Surat, India

- I worked with swift language.
- Learned with Apple UI/UX pattern.
- Learned MVC coding structure and project structure.

PROJECTS

Zap Power App (Customer & Driver)

- Technologies :- Flutter, Dart, Swift, Android, Firebase, SharedPreferences, Data Encrypt/Decrypt.
- Domain:- LifeStyle
- Duration:- September 2023 - Working
- Responsibilities:-
 - I am developing an app from scratch in Flutter.
 - I worked on UI designs with animation, API calls, Stripe Payment, Discount, Google Maps with live driver and customer locations.
 - I am still working on order details, loyalty program, fetch battery data from firebase.

FirmPet App

- Technologies:- iOS, SwiftUI, Firebase, MVVM, CoreData, Charts, URLSession, Data Encrypt/Decrypt.
- Domain:- Health-Fitness
- Duration:- February 2022 - May 2023
- Responsibilities:-
 - I developed an app from scratch in SwiftUI and implemented functionality based on client requirements.
 - FirmPet is an advanced Health Monitoring App with curated features for pet health. A uniquely designed app dedicated to offering a better lifestyle to pets and pet's daily activities as per the logs maintained to avoid long-term health risks.

Score Ice - Hockey App

- Technologies:- iOS, Swift, Animation, Push Notification, Stripe Payment, Firebase
- Domain:- Sports
- Duration:- January 2020 - August 2020
- Responsibilities:-
 - I have added some new functionality, reduced code, fixed bugs and made changes to the UI designs based on the client's needs. I have personally worked on this application.

App Link:- [Score Ice](#) 

Maangalya App

- Technologies:- iOS, Swift, Animation, Alamofire, MVC.
- Domain:- LifeStyle
- Responsibilities:-
 - We developed both these applications from scratch and implemented UI Designs and functionality with API calls based on client requirements.

App Link:- [Maangalya](#) 

Shree Khalashi Timala Punch App

- Technologies:- Flutter, Dart, API, Animation
- Duration:- August 2018 - October 2019
- Responsibilities:-
 - This was my first app that I developed from scratch in Flutter. We implemented functionality with API calls.
 - Functionality:-
 - Get community updates & news
 - Register to events organized by community

App Link:- Android:- [Shree Khalashi Timala Punch Rander](#)  || iOS:- [Shree Khalashi Timala Punch Rander](#) 

HomyComy App, Mahogany App & The RealtyDen App

- Technologies:- iOS, Swift, Animation, Realm, Alamofire, Firebase, MVC, Google Maps, Polygon, Polyline.
- Domain:- LifeStyle (Real-Estate App)
- Duration:- March 2018 - December 2018
- Responsibilities:-
 - We developed both these applications from scratch and implemented functionality with API calls based on client requirements. We developed both applications in a team.
 - **HomyComy, Mahogany & The RealtyDen app** is the online platform to see Canadian real-estate properties for buyers. It has many functionalities like Nearby gas station, school, grocery store and many more filters are available on that app. **like:-** that filter searches by Price, number of bedrooms, bathrooms, property type, homes for sale, homes for rent and more.

TECHNICAL SKILLS

Programming Languages :- Swift, SwiftUI, Dart

Maps & Location :- Google Maps, Apple Maps, Core Location, Polygon, Polyline

Payment Gateway Integration :- Stripe, PayUmoney, PayPal, Apple Pay

Chat Integration :- Firebase Realtime Database, Socket.io 

Tools & Collaboration

- **Version Control:** GitHub, Bitbucket, Jira, Trello, Slack
- **CI/CD & Tracking:** Firebase Crashlytics, App Store Connect

Libraries & Package Managers :- CocoaPods, Swift Package Manager

iOS Concepts :- Closures, Delegates, Protocols, GCD, Combine, Dispatch Queue, Async/Await, Task, Multi-threading, Data Encryption/Decryption, Deep Linking, Unit Testing, Memory Management

- In-App Purchase, Offline Storage, Multi-threading, Core Data migration, hardware sensor activation (Libre2)

UI Development :- Storyboard, XIB, Constraints, Auto-layout

Databases :- Core Data, Realm, Firebase

Social Integration :- Google, Facebook, Apple Sign-In

API & Data Handling

- **Parsing Techniques:** XML, JSON, GraphQL
- **Web Services:** REST, SOAP
- **API Integration:** URLSession, SwiftyJSON, Alamofire, Combine Framework

Notifications :- Firebase Cloud Messaging (FCM), Apple Push Notification Service (APNs)

Charts & Ads :- Custom Charts, Google AdMob Integration

UI/UX & Frameworks

- **SwiftUI:** Custom Views, Animations, EnvironmentObject, ObservableObject, Published, Combine
- **Flutter:** Dart UI Design, Animations, State Management

EDUCATION

Master of Computer Applications (MCA)
AES Institute of Computer Studies

Jun 2014 – Apr 2016
Ahmedabad, India

Bachelor Of Computer Application (BCA)
Shree Uttar Gujarat BCA College (VNSGU)

Jun 2011 – Apr 2014
Surat, India

PERSONAL DETAILS

- **DOB** :- 27th December, 1993
- **Marital Status** :- Married
- **Nationality** :- Indian
- **Driving License** :- Valid Indian Driving License
- **Visa Status** :- Employment Visa (Valid on 08 November 2025)

AWARDS & ACHIEVEMENTS

- Most Hardworking Team Member Award in 2023
- Most Improved Performer Award in 2022
- Computer Entrepreneur Award in 2017
